### REASONS FOR ALLOWANCE

1. Claims 1-23 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of a generator and method for generating a random number comprising: a plurality of cross-connected latches; a first XOR logic that receives input signals derived from the cross-connected latches and generates a current value of a mistake signal "E" when the input signals do not match; and a second XOR logic to compare the current value of the mistake signal with its previous along with other limitations cited in independent claims 1 and 14 in order to obtain a random number.

The closest found prior art is Weimerskirch (U.S. 6,963,888). Weimerskirch discloses a plurality of XOR logic in combine to generate a random number. However, Weimerskirch fails to either explicitly, expressively, or inherently disclose a specific structure and method of generating a random number using a plurality of cross-connected latches, a first XOR logic, and a second logic as seen in above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
